PROFILE

Location: Suwon, Korea (Relocating to Vancouver, BC on March 18, 2026)

PROFESSIONAL CAREER

Oct 2024 — Present	<div>Frontend-Engineer, Zium Knowledge Service<div>Seongnam</div><div>Naver Financial - Employee Welfare Platform (Frontend Lead)<div>Jan 2025 – Present<ul style="list-style-type: none">Led the design and implementation of a scalable SPA architecture using React Router Data APIsDesigned end-to-end authentication and error-handling flows between the BFF and frontend, including a custom error class-based domain exception frameworkEstablished a consistent async data-loading structure by separating route-level checks from client-side data fetching, primarily using React QueryReduced production bundle size by 30% and improved performance through lazy loading, dynamic module loading, and request deduplicationBuilt a complex form state management system using React Hook Form and Zod, including secure file signature verificationImproved production monitoring security and accuracy by applying Sentry integration with hidden sourcemapsImproved API reliability by migrating from swagger-typescript-api to Orval, introducing OpenAPI-based client generation with Zod-powered runtime response validation, reducing integration errors and increasing confidence in backend data contractsEnhanced user experience by implementing client-side timeout handling and refetch strategies during BFF delays and gateway timeout scenariosContributed to implementing a Canary dark-release deployment strategy to replace the legacy Blue/Green process, enabling stable QA and progressive rollouts</div><div>Naver Financial - Customer Inquiry Portal (Frontend Development, Sub Project)<div>Oct 2024 – Jan 2025<ul style="list-style-type: none">Implemented the customer inquiry page with requirement-driven UI improvementsImproved mobile UI stability through cross-device testing</div><div>Naver Financial - Internal Admin Dashboard (Frontend Development, Sub Project)<div>Apr 2024 – Jun 2025<ul style="list-style-type: none">Developed internal admin dashboards using React and applied Jotai for state managementIntegrated multiple BFF and backend APIs to support core features and ensure maintainable service interactions</div></div></div></div></div>
--------------------	--

PROJECTS

<div>Personal Portfolio & Tech Blog - ryanch0.dev<div>Oct 2025 – Nov 2025<ul style="list-style-type: none">Built a full-stack personal blog using Next.js 15 (App Router) and Supabase for authentication, storage, and database managementHandled login and post creation logic on the server using Next.js Server ActionsAdopted a static-first rendering strategy with on-demand revalidation using revalidatePath to balance performance and content freshnessImplemented a custom Markdown editor and renderer based on MDXBuilt a Tailwind CSS-based design system and improved UI detailsImplemented protected route handling and server-side auth verification using Next.js MiddlewareEnhanced login security by integrating CAPTCHA and applying Redis-based IP rate limiting to block bot and brute-force attacksBuilt an i18n locale management structure and improved routing by integrating it with MiddlewareOptimized asynchronous rendering and loading flows using Suspense to reduce UX delays</div><div>SimpleConvert – Offline (App Store)<div>Jul 2025 – Aug 2025<ul style="list-style-type: none">Built a lightweight offline file conversion app using on-device processing only, without any server or backend dependenciesFocused on solving a specific user problem - privacy and network dependency - by designing a simple, device-only conversion workflow</div></div></div>

- Implemented a straightforward UI to guide users through file selection and conversion with minimal friction
- Shipped the app to the App Store, taking full ownership of the product from development through public release

SKILLS	Core Frontend		
	TypeScript, JavaScript , React, Next.js, React Query, React Router, Jotai, React Hook Form, Zod, Tailwind CSS, Storybook		
	Styling & Tooling		
	HTML, CSS, SCSS, Vite, Git		
	DevOps & Monitoring (Working Knowledge)		
	Docker, Kubernetes (internal orchestration, CI/CD), Grafana		

LANGUAGES	Korean	Native speaker	English	Good working knowledge
-----------	--------	----------------	---------	------------------------

EDUCATION			
Feb 2017 — Feb 2025	B.S. in Electronic Materials Engineering, Suwon University		Suwon
Feb 2023 — Jan 2024	Diploma in Service Excellence for Business, ILAC International College		Vancouver
